RT² Profiler PCR Array (Rotor-Gene® Format) Human Nitric Oxide Signaling Pathway

Cat. no. 330231 PAHS-062ZR

For pathway expression analysis

Format	For use with the following real-time cyclers		
RT ² Profiler PCR Array,	Rotor-Gene Q, other Rotor-Gene cyclers		
Format R			

Description

The Human Nitric Oxide Signaling Pathway RT² Profiler PCR Array profiles the expression of 84 genes whose expression is controlled by or involved in signaling by the second messenger nitric oxide (NO). Nitric oxide is a dynamic and bioreactive molecule that can both participate in and inhibit the genesis of disease. Its ability to have an impact on a wide range of physiological events stems from its capacity to reversibly alter the expression of specific genes and the activities of a wide range of proteins and signaling pathways. This array contains genes involved in nitric oxide biosynthesis, superoxide metabolism and genes involved in response to oxidative stress. Also included are genes induced by or repressed by NO, which can be used as indicator for the activation of NO pathway in your cell system. Using real-time PCR, you can easily and reliably analyze expression of a focused panel of genes related to the Nitric Oxide signaling with this array.

For further details, consult the RT² Profiler PCR Array Handbook.

Shipping and storage

RT² Profiler PCR Arrays in the Rotor-Gene format are shipped at ambient temperature, on dry ice, or blue ice packs depending on destination and accompanying products.

For long term storage, keep plates at -20°C.

Note: Ensure that you have the correct RT² Profiler PCR Array format for your real-time cycler (see table above).

Note: Open the package and store the products appropriately immediately on receipt.

Array layout

The 96 real-time assays in the Rotor-Gene format are located in wells 1–96 of the Rotor-Disc[™] (plate A1–A12=Rotor-Disc 1–12, plate B1–B12=Rotor-Disc 13–24, etc.). To maintain data analysis compatibility, wells 97–100 do not contain real-time assays but will contain master mix to account for weight balance.

Gene table: RT² Profiler PCR Array

Position	UniGene	GenBank	Symbol	Description	
A01	Hs.525622	NM_005163	AKT1	V-akt murine thymoma viral oncogene homolog 1	
A02	Hs.654431	NM_000697	ALOX12	Arachidonate 12-lipoxygenase	
A03	Hs.654439	NM_000041	APOE	Apolipoprotein E	
A04	Hs.708024	NM_001172	ARG2	Arginase, type II	
A05	Hs.125213	NM_004045	ATOX1	ATX1 antioxidant protein 1 homolog (yeast)	
A06	Hs.434875	NM_003656	CAMK1	Calcium/calmodulin-dependent protein kinase I
