#### Description

The Human Cancer PathwayFinder Small (miScript) V2 miRCURY LNA™ miRNA Focus PCR Panel profiles the expression of 84 miRNAs differentially expressed in tumors versus normal tissue. This array provides cancer researchers with a convenient way to quickly analyze the miRNAs most relevant to tumorigenesis. These miRNAs have been carefully selected based on results published in peer-reviewed journals that suggest a correlation with the diagnosis, staging, progression, or prognosis of various cancers or tumors. For any given cancer, diagnosis markers are highly associated with its presence, while prognosis markers are used to successfully predict its clinical outcome. The profiling results from this array may yield insights into the molecular mechanisms behind the pathogenesis of many cancers or tumor types. A set of controls present on this array enables data analysis using the  $\Delta\Delta C_t$  method of relative quantification, assessment of reverse transcription performance, and assessment of PCR performance. Using SYBR Green real-time PCR, the expression of a focused panel of miRNAs related to cancer research can be easily and reliably analyzed with this miRCURY LNA™ miRNA Focus PCR Panel.

## Important

The miRCURY LNA™ miRNA PCR Panels are Ready-to-Use and designed for optimal performance with the miRCURY LNA RT Kit and the miRCURY LNA SYBR® Green PCR Kit. The performance of the primer sets will be affected when used in combination with less than optimal reagents. Use the miRCURY LNA miRNA PCR Panel Handbook for experiment setup. RNA work requires specific handling and precautions should be taken to prevent RNase contamination and degradation of the RNA sample and reagents.

## Shipping and storage

The Ready-to-Use miRCURY LNA miRNA PCR Panels are shipped at room temperature and can be stored at 4°C for at least 6 months. For long term storage, it is recommended to place the panels at -20°C. Under these conditions, the LNA PCR primers are stable for at least 6 months after receipt.

## Intended use

miRCURY LNA miRNA PCR Assays are intended for molecular biology applications. This product is not intended for the diagnosis, prevention or treatment of a disease.
